

Integrated Entrance Control Solution for the Ministry of Home Affairs in Indonesia

Industry

Government

Location

Indonesia

Solution

Entrance Control

Overview

The Ministry of Home Affairs (Kemendagri) is a ministry within the Government of Indonesia responsible for administering domestic governmental affairs. Kemendagri operates under and is accountable to the President. Its main duties include guiding regional governance, managing population administration and civil registration, overseeing domestic political affairs, and facilitating regional autonomy as well as relations between the central and regional governments.

Kemendagri also plays a role in maintaining governmental stability, strengthening the capacity of government officials, and ensuring that regional governance is carried out effectively and in accordance with laws and regulations.

Requirements

To safeguard the Ministry of Home Affairs (Kemendagri) building from unauthorized entry, our client expected an entrance control solution that is both highly reliable and quick to respond. Ensuring strong security and minimizing potential vulnerabilities are their main priorities. Alongside dependable performance and ease of operation, they value user convenience, an elegant and stylish device design, and rapid verification capabilities.

Solution

By integrating SBTL300 Series swing barrier gates with SpeedFace-V5 facial recognition terminals this solution delivers both high reliability and rapid response for the Ministry of Home Affairs building. The advanced biometric verification ensures secure access while reducing the risk of unauthorized entry. With its elegant, modern design, the system complements the building's aesthetic while offering user-friendly operation for all visitors and staff. The fast, contactless verification process minimizes wait times, creating a smooth and secure flow at entry points, ultimately enhancing safety and efficiency for daily operations.
